

audio research

As we wrap up the year, Audio Research is in full production of the newest member of our lineup, the CD6. Both a cd player and DAC, the CD6 has taken many clues from its bigger sibling, the Reference CD9.

McIntosh

The McIntosh MT5 Turntable was one of only 10 products to receive the prestigious "Stars of CES 2013 Award" from What Hi-Fi. Since then it has received numerous other accolades, such as being called "the turntable of the gods" by Rolling Stone, "a turntable worthy of one's most cherished vinyl" by The New York Times as well as being named to numerous "Best Of" lists and Holiday Gift Guides. We'll have the MT5 at CES 2014 along with some exciting new products that are sure to earn more attention and praise in the year ahead.

Sonus faber

Finally, after the launch on line, *Homage Vox* will be displayed for the public at CES 2014 in a stunning Home Theater set up with *Amati futura* and *Guameri* evolution. This extraordinary system will be driven by a powerful McIntosh system made up by the MX151, the MC207, and the MVP891.

Wadia

The CES 2014 in Las Vegas will offer Wadia Digital the opportunity to introduce its new projects, engineered and designed to surprise its audience. Come to experience these exciting new products that won't let you down!
