## ON SHOW AT CES 2014

### audiolab M-CDT

M-CDT is a perfect complement for the  
M-DAC as it offers the additional  
feature of a CD player to your existing  
digital music setup. Not only does it  
seamlessly connect with the M-DAC it  
can also be controlled with the M-DAC  
remote.

sonic  
emotion  
ABSOLUTE 3D

### MISSION AERO

Mission Aero replaces the more  
cumbersome CD player, amplifier and  
speakers with a single, shelf mounted  
jewel of a speaker system. It re-creates  
the sound of a fully featured hi-fi  
system through Mission's innovative  
Absolute 3D sound system from Sonic  
Emotion.

### MISSION PULSE WITH NFC

Mission is proud to reintroduce Pulse,  
now with NFC. Pulse features a  
full-range NEO motor system, powered  
by a fine-tuned, matching Class D  
amplifier. With this extra connectivity,  
streaming your favourite album is just  
a touch away.

### QUAD VENA

Quad Vena is a highly versatile amplifier  
system designed to be the perfect match  
to a huge variety of digital and analog  
sources. In one neat package Vena  
provides the necessary amplification to  
realise the highest quality of your stored  
music replayed through any loudspeakers  
or headphones.

### Wharfedale DS-1

The Wharfedale DS-1 may look like a  
traditional stereo speaker but there's  
more going on underneath than you  
may first think. These two way  
speakers feature active amplification  
that accepts both line level inputs and  
Bluetooth wireless transmission, high  
quality ensured by AptX.

### Wharfedale VISTA

Wharfedale's new Vista 100 is a  
soundbar that plugs straight into any  
TV to deliver a warm, rich and highly  
intelligible sound quality that  
automatically upgrades the listening  
experience. You no longer have to  
worry about the quality of sound from  
your ultra-thin TV.
